GetMyPOV F/C - Quick start

- Install the app on two devices. Let's say them **A** and **B**

- **DO**

    - On both A and B, get access to an accessible nearby Wi-Fi newtwork

  OR

    - On A, turn the Wi-Fi hotspot service on (whatever password is set it is to be used by B to access the Wi-Fi network this way created).

    - On B, get access to the Wi-Fi newtwork created by A

- Launch the app in both A and B and select your preferred language

- In B, touch the "Camera" checkbox, then grant the requested camera permission to the app.

- In A and in B touch the "Start" button, and wait for the streaming to flow, by looking at the monitor line at the top of the panel.

- <u>After the connection has occurred</u>, in A, look at screen and use the commands available in the panel, especially those ones of the "Remote device" section, to control the way B makes the capturing and the forwarding of frames to A.

- For **recording** purposes you can operates in each of the following ways:

    - acting, in A, on the "***Recording***" checkbox, located in the "*Received scene management*" section, to have the recording to occurr on A

    - acting, in A, on the "***Record on place***" button, located in the "*Remote device*" section, to have the recording to occurr on B

    - acting, in B, on the "***Recording***" checkbox, located in the "*This device*" section, to have the recording to occurr on B

- To see the content of the recordings, select the "***Files***" mode from the pop-up menu that opens by touching the "*Auto*" value, then touch the "Open" button, touch the folder you find this way and, at last, touch a frame-collection item: An internal frame viewer opens on the selected collection, and you can play it by means of the "**>>**" button.

- To exit the frame viewer, use the left arrow located at the left-top corner

- you can manage the items with the buttons at the bottom

- To exit the app file-system, use the left arrow located at the left-top corner

In order to use more features of the app I suggest to have a look at the user guide you can find at https://appsdips.com/apps/getmypov/en/user_guide_common.php because the app has several features that cannot be bound in a small guide. You can also watch the first part of the 26' video located at https://youtu.be/IoVJpP_elb0

Thanks for reading !
